

Custom innovation!

Company values & expertise

As a French manufacturer of industrial paints and varnishes for 130 years, Bonnabaud offers innovative and sustainable solutions to meet the specific requirements and industrial demands of its clients.

From innovation in R&D to complete end-to-end control of our manufacturing processes, our fully integrated production system allows us to provide controlled, competitive customised solutions for all types of substrates and every usage constraint.

Research and development

FORMULATION AND CHARACTERISATION

From standard formulation to custom developments, our laboratory tailors our solutions to your needs. Starting from the need you have identified, our teams apply a global approach to design the bases, pigment pastes, paints and varnishes that meet your requirements.

Variety of colours and shades, effects with different materials, special effects and performances: our products will give you innovative and long-lasting results.

Quality

PERFORMANCE DRIVERS

Our biggest priority is to ensure we meet the standards required by our customers and that means guaranteeing a high level of quality.

Our analysis and testing equipment allows us to perform tests and measure every aspect of the coatings we produce: colorimetry, gloss, adhesion, drying, toughness, salt spray testing, etc.

All our products and their components comply with the REACH Regulation.

Fully integrated production

AGILITY AND RESPONSIVENESS

From formulation through to packing, we have total control, in-house, of all of the production processes involved in manufacturing our products. That means we can respond fast to your requests and offer short and reliable delivery times in France and Europe.

Packaging

ANYTHING FROM 5 KG TO 1,000 KG

Our packaging offer is designed to cover all usage constraints. We offer aerosol cans, 5 to 30 kg pails, drums and 200 to 1,000 kg IBCs, and we can adapt our packaging solutions to meet specific requirements. We also have the storage capacity to comfortably manage and supply the products you order.

French designed and made

Industrial applications

For all metal, wood, plastic or glass substrates.

Bonnabaud, specialised in industrial liquid paints and varnishes, brings a wealth of experience and expertise to developing coatings to meet its customers' specific needs. It offers them a wide range of high added-value solutions combining innovation and high performance to meet their precise specifications.

ANTI-CORROSIVE PRIMERS

Our anti-corrosive primers applied to any metal substrate guarantee perfect protection in damp, corrosive environments.

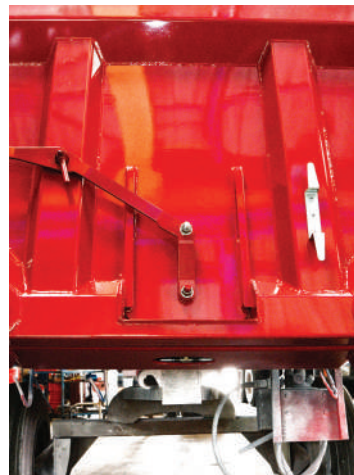

Our primers provide excellent adhesion.

TOPCOATS, VARNISHES, ANTI-CORROSIVE FINISHES

Our finish coatings guarantee you long-lasting protection as well as an attractive finish on all substrates, both indoors and outdoors.

Finishes: gloss, matt and satin

OUR SPECIAL PRODUCTS

Our epoxy ranges:

With their proven qualities of chemical resistance and mechanic strength, our epoxy primers and paints are suitable for application to all metal substrates and guarantee a high-quality finish.

Our high temperature ranges:

Heat resistant paints specially designed for use on substrates subjected to high temperatures.

Our products for the building industry:

Acrylic and pliolite paints for indoor and outdoor applications.

Our products for floors:

Solvent-free two-part epoxy resin paint for concrete floors.

OUR CORE VALUES:

- CUSTOMER SATISFACTION
- QUALITY
- INNOVATION
- ENVIRONMENT

DILUTANTS AND HARDENERS

Our dilutants and hardeners are specifically formulated to adapt to your application conditions.

All our products are available in **solvent-based** and **water-based** versions.

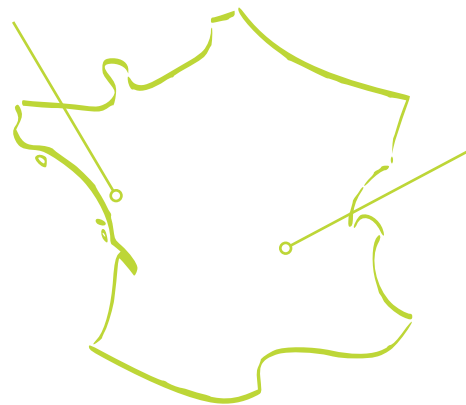

Our formulations can be tailored to your needs!

From innovation in R&D to complete end-to-end control of our manufacturing processes, our fully integrated production system allows us to provide controlled, competitive customised solutions for all types of substrates and every usage constraint.
